# AVONBANK PROJECT INTRODUCTORY WEBINAR SESSION

APRIL 2021

REGISTER TO RECEIVE LOG-IN INFORMATION

WIM Resource Pty Ltd (WIM) is an emerging major producer of zircon and titanium. The Avonbank Project is its flagship heavy mineral sands (HMS) project and is currently at feasibility and approvals stage, with the expectation to commence construction by 2023-2024.

From 2019-2020, WIM undertook a test pit trial and a pilot plant at site, which is now undergoing Stage 2 rehabilitation.

WIM will be hosting an introductory webinar in mid-April 2021. Join us online to learn more about the Avonbank Project, its progress, and to meet with the team. Everyone is encouraged to attend. For those unable to attend, the webinar will be recorded and uploaded to the WIM website.

## LEARN ABOUT WIM AND THE TEAM

## LEARN ABOUT HMS MINING & PROCESSING
